CATALOGUE

NORTHERN
SWIM SPAS®

Live True North.

Northern Leisure® was founded to bring our fellow Canadians an affordable, luxurious backyard wellness experience designed for the way we live. Born, raised, and rooted in the North, we understand the Canadian lifestyle - from long winters to unforgettable summers spent relaxing with family and friends.

That's why every Northern Swim Spa® is built to perform in the climate we know best. Engineered to handle harsh Canadian weather, our swim spas deliver year-round comfort, relaxation, and rejuvenation so you can enjoy an all-season pool experience for years to come.

Northern Swim Spas® are crafted with quality, comfort, energy efficiency, and ease of use in mind. Available across Canada, each spa is supported by a trusted local Dealer who will guide you through every step - from purchase to VIP delivery and professional setup.

NORTHERN
SWIM SPAS®

Well-Built Swim Spas Made for Canada

When choosing a swim spa, it's natural to focus on what you can see - the colour, size, seating, jets, and swim performance. But the true value of a Northern Swim Spa® lies beneath the surface, where premium engineering and thoughtful construction deliver years of comfort, durability, and energy efficiency. It's the technology behind the scenes that creates the warm, relaxing, and rejuvenating experience you enjoy every time you step into the water.

Each Northern Swim Spa is built on a precision-welded galvanized steel frame, providing exceptional structural strength and long-term durability. The shell is crafted from premium acrylic and reinforced with an advanced three-stage fibreglass backing system for added strength and reliability.

To maximize energy efficiency, a high-density polyurethane insulation system is applied generously to both the shell and plumbing lines, helping maintain water temperature and reduce operating costs. In addition, perimeter heat-lock insulation is installed within the maintenance-free synthetic cabinet, which joins seamlessly with the weather-tight base to fully encapsulate the swim spa - keeping heat in while keeping cold air and unwanted critters out.

- 1** Sturdy Weathertight Base & Galvanized Steel Frame
- 2** Indestructible Three Stage Acrylic & Fibreglass Shell
- 3** Maintenance-Free, Removable Synthetic Cabinet
- 4** Energy Efficient Four-Part Insulation System
- 5** Expertly Installed Plumbing, Jets, Fittings and Equipment

Well-Equipped Swim Spas Mean Maximum Enjoyment

Northern is committed to delivering a dependable swim spa that includes everything you need without unnecessary complexity. Expertly engineered swim lanes provide the perfect balance of fun and fitness, while our powerful North Stream jets create a smooth and enjoyable swimming experience. Inside, you'll discover durable underwater LED lighting designed for both ambiance and safety, along with conveniently placed grab handles and safety rails for added comfort and confidence. An advanced electronic water purification system helps keep your water crystal clear with minimal effort.

Our swim spa packages also feature elegant waterfalls and a generous selection of strategically positioned hydrotherapy jets, providing a relaxing and rejuvenating massage experience. To complete the package, each swim spa includes a premium-quality cover for outstanding energy efficiency, safety, and security.

- 1 Outstanding Swim Lane and Hydrotherapy Massage Seats
- 2 Beautiful LED Lighting Package
- 3 Electronic Water Purification
- 4 Soothing Waterfall
- 5 Advanced Digital Controls

Wi-Fi Ready

Swim Spas for Ultimate Convenience

Your Northern Swim Spa® can be upgraded with an optional Wi-Fi module, allowing it to connect to the internet through your home router. Once connected, you can download the app on your iOS or Android device to conveniently monitor key functions such as temperature settings and filtration schedules. Intelligent programming lets you operate your spa during off-peak electricity hours to help reduce energy costs. In addition, remote diagnostics can provide service codes for easier troubleshooting from virtually anywhere - making it an ideal feature for vacation properties or secondary homes.

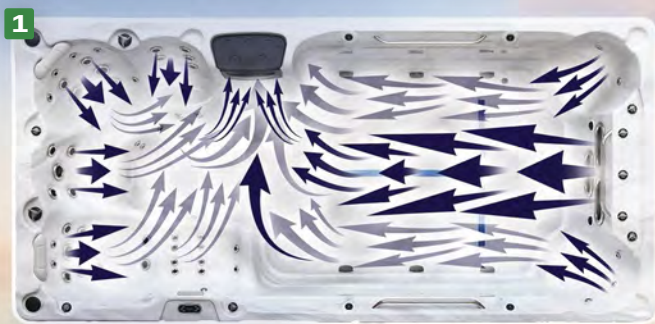

- 1 Simple to Use App for your Smartphone
- 2 Monitor Your Swim Spa From Anywhere
- 3 Easily Control Jets, Lights & Temperature
- 4 Program Filter Cycles & Other Functions
- 5 Program to Run During off Peak Hours

Straightforward Swim Spas Make Life Easier

A swim spa should enhance your lifestyle, not create extra work. That's why our swim spas are built for simple, hassle-free maintenance, with automated systems that take care of water management for you. From daily circulation to ongoing filtration and cleaning, every component works together to keep your water clean, clear, and ready whenever you are. No complicated routines, constant adjustments, or unnecessary extras — just dependable systems designed to make ownership easy, so you can spend less time maintaining your swim spa and more time enjoying it.

What Straightforward Means...

Automatic Circulation

Automatic Filtration

Automatic Sanitization

Automatic Purification

All-Inclusive Swim Spas Simplify Buying

Many swim spa dealers structure their pricing and packages to give sales teams more room to negotiate and upsell. At Northern, we keep things simple and transparent. Our swim spas come as all-inclusive packages with very few add-ons, no confusing upgrades, extended warranty pressure, markup and discount tactics, or sales games.

You receive everything available for your swim spa in one easy-to-understand package, with swim spa financing options available. A limited selection of accessories, such as Wi-Fi connectivity and upgraded roll-up covers, can also be added. Your Northern Swim Spa dealer will help you choose the right accessories based on your installation requirements and personal needs.

- 1** Comprehensive Swim Spa Package
- 2** Steps, Cover Lifter & Backup Heater as Required
- 3** VIP Delivery and Set Up (*Service Fees Apply*)
- 4** Thorough Swim Spa Operation Orientation
- 5** Complete Water Care Instructions

Sensibly Priced Swim Spas Give You Peace of Mind

We're committed to delivering premium-quality swim spas at a price that makes sense - so you can invest in your health and wellness without overspending. To achieve this, we source industry-leading electronics, acrylics, resins, polymers, and other critical components known for their performance and reliability.

Our swim spas are then manufactured in high-quality, high-volume OEM facilities to meet our exacting standards. By shipping directly by container from the factory to our Canadian Distribution Centre or trusted Dealer Partners—and then straight to your home—we eliminate unnecessary markups and pass the savings on to you, often saving you thousands of dollars.

- 1 Transparent and Haggle Free Swim Spa Prices
- 2 Low Monthly Payment Financing Available
- 3 No Upselling or Extended Warranties
- 4 No Gimmick Sales Approach
- 5 Best Price Always Guaranteed

"This was a great experience from purchase to install. We feel the price was fair and competitive, but more important customer service was great! The team made sure we were fully informed and knew what we were doing before leaving at the end of the install. Would highly recommend!!"

Benefits of Owning a Northern Swim Spa®

To Your **Good Health**

Hydrotherapy combines three powerful wellness elements: heat, buoyancy, and massage. Together, they create an exceptional experience that is both deeply relaxing and incredibly beneficial to your overall health. Regular use of a Northern Swim Spa® offers physical and therapeutic benefits that go far beyond simple relaxation and enjoyment. Water may seem simple, but its healing properties are truly remarkable. Whether you are looking for low-impact aquatic exercise, relief from joint or muscle discomfort, improved sleep, or a way to reduce everyday stress, spending time in a swim spa can provide therapeutic benefits for people of all ages and lifestyles. From fitness and recovery to relaxation and wellness, a Northern Swim Spa supports a healthier, more balanced way of living.

Reduce Headaches & Stress

Warm water massage in a Northern Swim Spa® can stimulate the body to release endorphins, helping to naturally reduce stress and promote relaxation. The powerful hydrotherapy jets are designed to target key muscle groups while also encouraging healthy circulation by dilating blood vessels, which may help relieve tension and reduce headaches. Beyond fitness and recovery, a Northern Swim Spa can also support better sleep. The National Sleep Foundation notes that *"soaking in a hot tub before retiring to bed can ease the transition into a deeper sleep."* Many swim spa owners incorporate a daily 20-minute hydrotherapy session into their wellness routine, using the soothing warm water and massage jets to unwind, ease stress, reduce headaches, and improve overall well-being.

Relieve Muscle & Joint Pain

In recent years, the use of hydrotherapy swim spas by athletes has skyrocketed, and swim spas are now leading the way in bringing these wellness benefits to a broader audience! As one popular sports magazine explained: *"Your skin and muscles loosen and relax from the increased blood circulation,"* adding that if muscles are injured, *"A soak in warm hydrotherapy water increases blood flow to the injured area, bringing nutrients to help repair the damage."* Using a swim spa regularly can help relieve muscle soreness, reduce lactic acid buildup, improve flexibility, and support faster recovery - all while providing a relaxing, low-impact environment for exercise and rehabilitation.

Soothe Arthritis Pain

Warm water hydrotherapy in a well-designed swim spa is believed to help those living with arthritis pain. The soothing warmth, buoyancy, and gentle resistance of the water create a comfortable, low-impact environment that may help reduce joint stress, ease stiffness, and improve mobility. Hydrotherapy is widely recognized as one method of using water to support relief from the discomfort associated with arthritis, while also encouraging light exercise and relaxation. Arthritis can cause acute pain, but more often it becomes a long-term chronic condition that people must learn to manage, as there is currently no known cure. A swim spa offers more than just relaxation - it provides a versatile space for hydrotherapy, stretching, and low-impact aquatic exercise that may help make daily life more comfortable and enjoyable. If you have arthritis, a swim spa could be the key to experiencing less pain, greater mobility, and a healthier, more active lifestyle.

Help Manage Diabetes

Researchers have reported that warm water immersion and hydrotherapy - including regular use of a swim spa - may help support diabetes management. Studies have shown that hydrotherapy can contribute to lower blood pressure and help reduce blood sugar levels. In one Colorado-based study, diabetes patients who soaked in warm water for approximately 30 minutes a day, 6 days a week, experienced an average blood sugar reduction of 13%. Swim spas also offer the added benefit of gentle, low-impact exercise through swimming or aquatic fitness, which can further support circulation, cardiovascular health, and overall wellness. For safety, users should limit warm water soaking sessions to about 20 minutes at a time, especially at higher temperatures. Never use a swim spa alone, and always ensure someone is nearby in case of an emergency - even if you are in otherwise good health.

Time with Family & Friends

How can many leisure activities targeted at relaxation be readily enjoyed at any time, day or night, without ever leaving home? The answer is practically none! A recent survey of swimming pool owners revealed that many only enjoyed their pools a few dozen times a year, and jetted bathtubs are also used very infrequently! In contrast, a hot tub is easy to use and is designed to maintain the user's water temperature consistently. As a result, it's always ready and waiting to be used for fun and relaxation - 24 hours a day, 7 days a week, 365 days a year!

Year Round Fun

A recent survey revealed that swim spa owners enjoy their investment at an average of 150 times a year! Designed for year-round use, swim spas maintain the water temperature you choose, so they're always ready whenever you are - whether for exercise, relaxation, or family fun. Adjusting the temperature in a Northern Swim Spa® is simple thanks to its fully electronic controls. While cooler settings provide a refreshing escape during the summer months, few experiences compare to the comfort of swimming or unwinding in warm, bubbling water on a crisp, cool evening.

Installation Ideas for Your Northern Swim Spa

"After shopping around I was sold on the features of the Northern brand and the warranty it comes with. The company was great to deal with. Delivery went smoothly and I was taught everything to maintain the product. I was surprised how well built the tub is and the service was 5 star. Definitely would recommend Northern to anyone. AWESOME job and thanks again everyone!"

Alex Clark

"Friendly staff and so helpful with setting me up with my on line ordering. Very welcoming and made me feel like I was dealing with family. The product was installed with ease, and we love it! Used every day as I have arthritis and I could not be happier. Thanks, Northern team!"

Mike Dawe

Garden

Installing a swim spa in your backyard creates a stunning and relaxing environment to enjoy year-round. The natural surroundings enhance the spa experience, and with careful planning of the swim spa's orientation, the main seating and swim area can take full advantage of the best views on your property. When designing your space, be sure to consider privacy during the winter months when trees and landscaping may offer less coverage. A properly selected and installed swim spa cover should be secure, easy to operate, and designed to withstand the elements. The cleanest swim spa installations also feature concealed electrical connections, with wiring routed up through a weather-tight base to eliminate exposed cables and maintain a polished, professional appearance.

Pad Only

A Northern Swim Spa® is built on a durable galvanized steel frame and features a fully enclosed, weather-tight, and critter-resistant base. This innovative design allows your swim spa to be installed on virtually any flat, level surface. However, for optimal performance and longevity, we highly recommend a concrete pad, patio stone, or paving stone base.

Adjacent

It is common for an existing wood deck to already be in place before a swim spa is purchased. If your deck space is limited or you prefer not to have the swim spa obstruct views from the home, installing the swim spa adjacent to the deck can be an ideal solution. A solid, level surface such as a concrete pad or patio stone base is strongly recommended for proper support and longevity. When planning the installation, be sure to consider swim spa access, step placement, cover lifter positioning, and the clearance required for cover operation. This is one of our favorite and most recommended swim spa installation methods thanks to its clean aesthetics, easy accessibility, and the low-profile appearance of the swim spa when viewed from the home.

In a Deck

The primary reason for recessing a swim spa into a deck is for enhanced aesthetics and easier access. Integrating the swim spa into the deck design creates a sleek, low-profile appearance that can complement your outdoor living space and provide a more seamless transition into the water. When planning a deck installation, it is essential to consider future service access. Your swim spa installation must include removable deck panels on all four sides to allow technicians to access the equipment when maintenance or repairs are required. Without proper access panels, servicing the swim spa may require the unit to be completely drained and lifted out of the deck structure before any work can be performed, resulting in additional time, cost, and effort.

Porch

A covered porch can provide the ideal environment for a swim spa installation. One of the greatest advantages is protection from the elements, helping to simplify maintenance while extending the lifespan of both the swim spa and its cover. Swim spas installed under a porch are often located close to the home's main access point, which we highly recommend for added convenience and year-round usability. Porch installations are also extremely practical, as the swim spa, entry steps, and cover lifter can all be strategically positioned for easy access, comfort, and effortless operation.

In Ground

An in-ground swim spa installation is the most complex and costly type of setup. Similar to an in-ground swimming pool, the installation requires excavation of the site before the swim spa is carefully lowered into place. A reinforced concrete vault or four-sided retaining wall system is typically required, along with proper drainage and a sump pump to prevent groundwater from damaging the swim spa's pumps, motors, and electrical components. While in-ground swim spas create a sleek, custom-built appearance, they also involve higher installation and maintenance costs. Financing options may be available through your local swim spa dealer to help make the investment more manageable. It's also important to consider practical factors with in-ground installations. Traditional cover lifters are often less effective or incompatible due to the recessed design, and because the swim spa sits at ground level, dirt, leaves, and debris can more easily blow into the water whenever the cover is removed or while the spa is in use.

Gazebo

A gazebo over your swim spa adds style, privacy, and protection from the sun and the elements, creating a more comfortable year-round backyard retreat. Gazebo-covered swim spa installations are especially popular in treed settings, helping to reduce leaves, debris, and other outdoor contaminants from collecting on the cover or in the water. No matter which Northern Swim Spa® model you choose, it's important to ensure the cover can be easily removed and replaced for convenient everyday use. Swim spa seating and jet configurations vary between models, so keep this in mind during the planning process. Proper orientation of the swim area, hydrotherapy seats, and entry points will play an important role in selecting the ideal model and placement for your space.

Northern Swim Spas® **Authentically Northern**

Northern Swim Spas® are designed to withstand the harsh Canadian climate and provide many years of worry-free ownership. A swim spa must be comfortable, energy-efficient, easy to maintain, deliver a fantastic swimming and hydrotherapy massage, and be free of troublesome gadgets for maximum swim spa enjoyment. Our Northern Swim Spa will provide everything you need to swim, soak, rejuvenate, and relax in complete comfort.

"It was an absolute pleasure working with this company to purchase our first Northern. Right from the start, the company took us through the options and answered all our questions. Tanya was lovely and informative as to the payment and delivery processes. Thanks to Steve and his crew for the install - all so friendly and punctual, and set up time was much faster than we expected. They were thorough in explaining the ongoing maintenance and features. We were able to enjoy our first soak that evening and we've made excellent use of it since! We highly recommend this company for its professionalism, service and price point."

Shalini Maharajl

"Our new Northern was delivered a couple days ago. It was set up, filled and started. The guys were great at explaining everything and going through the maintenance process. All and all a seamless experience and we would highly recommend Northern Leisure Products without question."

Ulf Strehl

NORTH STREAM 12 ft. SWIM SPA

Our North Stream 12' Swim Spas are self-contained, compact swim spas that combine the functions of a swimming pool and a hot tub. It is only 12 feet long and features powerful turbo jets that offer aquatic resistance for light exercise and full-on fun. Our Northern Leisure 12' Swim Spa are designed for limited spaces like urban backyards, and their features include options for hydrotherapy massages, year-round use, and offer swimming and soaking solutions simultaneously.

"Great experience end to end in getting my new Northern. I appreciated all the details they've thought of for new owners learning the ropes. Great tutorials and personal touches throughout the process of buying and set up. I would buy from Northern again ... Love the team, super easy to deal with!"

Jen Bombis

"Excellent service and support from office staff! Then they delivered as scheduled, set it up, and gave us detailed instructions on the use, care & maintenance. Also diagnosed and solved minor problems with the electrical connection and with the set-up and use of the phone app. Highly recommended!"

Rudy Hartman

"We had a fantastic experience with Northern. The staff was very helpful with coordinating the installation. There was a slight mix up in scheduling which was rectified immediately and we were sent flowers and homemade honey as a thank you. The installation was complete and we were through "water care school" to learn the ins and outs of maintenance plus using the optional Wi-Fi enabled features. 10/10 would recommend a Northern to anyone."

Melissa Feifried

Introducing the Best of Both Worlds

NORTH STREAM 19ft. SWIM SPA

Northern Leisure® offers the ultimate combination of a premium swim spa and hot tub experience, designed to support a healthier, more active lifestyle year-round. Our Northern 19' Dual Temperature Swim Spa delivers the perfect balance of fitness, relaxation, and family fun in one luxurious backyard retreat. Whether you are committed to regular aquatic exercise, training, hydrotherapy, or simply enjoy casual swimming and entertaining, the Northern 19' Dual Temperature model provides the versatility to meet every lifestyle. Featuring separate temperature zones for swimming and hot tub relaxation, you can enjoy invigorating exercise in one area while unwinding in the other's soothing warm water - all at the same time.

Built for all-season enjoyment, the Northern 19' Dual Temperature Swim Spa is fully loaded with premium features and engineered for durability, comfort, and performance. Its powerful swim current system delivers a smooth, consistent flow that allows you to swim continuously without interruption, helping you focus on technique, endurance, and personal fitness goals without ever needing to turn or push off a wall. From family gatherings and recreation to fitness training and relaxation, this all-season swim spa creates unforgettable experiences while enhancing your outdoor living space. With a Northern Leisure Swim Spa®, your dream of a year-round backyard oasis becomes a reality.

Our Hot Tubs Are Authentically Northern

Northern Hot Tubs® are designed to withstand the harsh Canadian climate and provide many years of worry-free ownership. A hot tub must be comfortable, energy-efficient, easy to maintain, deliver a fantastic hydrotherapy massage, and be free of troublesome gadgets for maximum hot tub enjoyment. Our Northern Hot Tubs will provide everything you need to soak, rejuvenate, and relax in complete comfort.

Premium Hot Tubs

Exude Quality, Comfort, Energy Efficiency and Ease Of Use

Northern Hot Tubs® was created to bring Canadians an affordable, luxurious backyard spa experience. Proudly born in the North, we understand Canada's unique climate - from harsh winter conditions to warm, relaxing summers. That's why our hot tubs are specifically engineered to withstand the elements while delivering reliable comfort and rejuvenating hydrotherapy year after year. Our premium hot tubs are built with quality, comfort, energy efficiency, and ease of use in mind. Designed to maintain their ideal temperature efficiently, they're always ready whenever you are. Whether you're looking for an intimate two-person spa or a spacious model for up to ten people, Northern Hot Tubs offers a range of options to suit your lifestyle. Our collection includes the Moraine, Ramsey, Georgian, Huron, Williston, Manitou, and Laurentian models - each crafted to provide lasting performance and relaxation for years to come.

Georgian Hot Tub

Plug and Play Hot Tubs

The Name Says It All

You've decided it's finally time to get a hot tub, but you're not quite ready to commit to the full investment. Maybe you're working within a budget, dealing with limited space, or balancing a bit of both. You want all the relaxation and enjoyment of a hot tub - without the stress that can come with a major installation. Northern Hot Tubs has the perfect solution: Plug & Play hot tubs. Our Plug & Play lineup features convenient 120V models, with select tubs convertible to 240V for enhanced performance. Designed for flexibility, comfort, and ease of setup, these hot tubs are ideal for a variety of spaces and lifestyles. Choose from a wide selection of models ranging from cozy 3-person tubs to spacious 6-person options, including: Kootenay, Joseph, Simcoe, Muskoka, Algonquin and Hudson. With Northern Hot Tubs, getting into hot water has never been easier - or more relaxing.

Simcoe Hot Tub

Introducing Our Premium Ice Bath Tubs

Recover Like Athletes Do

Unless you have been a competitive athlete or have parented a child who travels all over the region competing in the highest level of their chosen sport, the concept of cold-water therapy might be chilling to you. Why would anybody want to get into a tank of cold water purposefully? Our Cold Plunge Tanks will help you lead a happier, healthier lifestyle if you want to delay the onset of sore muscles, feel less tired, or treat inflammation.

For Sore Muscles, our Cold Plunge Tanks work to constrict your blood vessels. Your blood flow slows down enough to relieve much of the painful feeling and swelling you are experiencing in your muscles after physical activity. It doesn't have to be that you went for a run or played in a badminton tournament. Cold Plunge Tanks will help your muscles if you've been standing a lot at work, walking your dog, or using muscles you haven't used in a while.

Feel Less Exhausted our Cold Plunge Tanks provide cold water therapy to help re-exhilarate you and put you in a more positive mindset because of certain brain chemicals released when you are chilling. The result is that you get a second wind to get through the rest of your day.

Muscle Inflammation, our Cold Plunge Tanks can assist with widespread concerns such as tendonitis or bursitis. The therapy provided by the cold water serves as an anti-inflammatory without having to take medicine. The affected area becomes numb, and the pain, swelling or tenderness you feel subsides as your circulation improves.

Foldable Muskoka Chairs

Innovative Durable and Convenience

Northern Leisure® Muskoka Chairs are crafted from premium virgin high-density polyethylene (HDPE), offering exceptional durability, colour retention, and UV protection to resist fading over time. Inspired by the timeless design of the traditional Muskoka chair, our innovative foldable construction allows for easy storage during the winter months without compromising style or comfort. By combining high-quality materials with thoughtful engineering, we create outdoor furniture that is both beautiful and built to last. Each chair is precision-manufactured using advanced computeraided cutting technology, ensuring superior fit, finish, and ergonomic comfort.

Discreetly installed stainless steel hardware adds strength and durability while providing years of maintenance-free enjoyment. Our chairs arrive partially assembled and can typically be completed in just five minutes. For added protection during transit, each chair is carefully packaged in a flat, protective box to help ensure it arrives safely at your home or cottage.

FOLDABLE
for convenient
winter storage.

Low Smoke Fire Pits

Ignite the perfect outdoor ambiance without the smoky hassle!

Our new Stainless Steel Low Smoke Fire Pits features a sleek, durable design and advanced airflow technology for a cleaner, more enjoyable burn. Complete with an essential ember guard and lift tools, it's engineered for backyard beauty and safety.
