

Sauna Base Installation GUIDE

Follow these simple rules for the perfect sauna installation that will provide years of enjoyment.

DON'T...

The entire bottom of the sauna must be fully supported.

Failure to do so can result in structural damage.

DON'T...

Sauna base must be level within 1/2" across the full length and width of the sauna.

Sauna must be as level as possible.

DON'T...

Uneven base prevents the sauna from being fully supported.

The entire bottom of the sauna must be fully supported. Failure to do so can result in structural damage.

DO...

Sauna is level within 1/2" and bottom is in full contact with the base.

The sauna base can be made from concrete, patio slabs,paving stones or set on a properly supported wood deck.

Keep this in mind when installing...

- Plan for any of your custom installed lighting.
- Position the heater WI-FI module as close to the router as possible.
- Provide for adequate water drainage as the horizontal cedar can't withstand being exposed to continual wet conditions.
