CATALOGUE

NORTHERN
HOT TUBS®

Live True North

Northern Hot Tubs® was formed to provide you, our fellow Canadian friends and neighbours, with an affordable and enjoyable luxury backyard experience that we understand, and you deserve. We were born in the North, grew up in the North and still live and love the North. We know Canada - harsh winters sure, but happy summers and happy hot tub customers too!

That's why we build our hot tubs to withstand a climate that we know - so you can weather the snow and relax, comfortably with rejuvenating hydrotherapy for many years to come. How? Read on...

Northern Hot Tubs exude quality, comfort, energy-efficiency and ease of use and they are manufactured with Canadians in mind. Get a Northern Hot Tub shipped directly to you anywhere in Canada or work with a local, qualified expert Dealer Partner from purchase to delivery and set up.

NORTHERN
HOT TUBS®

Well-Built Hot Tubs Made For Canada

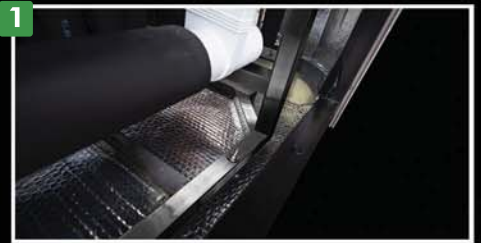

We understand that you buy a hot tub based on things that you can see: color, size, seats and jets. But it's the features under the hood of a Northern Hot Tub® that will provide you with years of enjoyment and energy efficiency.

Here's the technical stuff that helps make you feel warm and fuzzy when you are in the water feeling hot and bubbly. Our 304 stainless steel frame supports the hot tub shell for its lifetime.

The shell is precisely formed with premium acrylic and a special 3-stage fibreglass backing. A 5-part insulation system is installed behind the maintenance-free synthetic cabinet which meets the weathertight base to fully encapsulate your hot tub keeping heat in while keeping the cold and critters out.

- 1 Sturdy Weathertight Base & Stainless-Steel Frame
- 2 Indestructible Three Stage Acrylic & Fibreglass Shell
- 3 Maintenance-Free, Removable Synthetic Cabinet
- 4 Energy Efficient Five-Part Insulation System
- 5 Expertly Installed Plumbing, Jets, Fittings and Equipment

Well-Equipped Hot Tubs Mean Maximum Enjoyment

Northern Hot Tubs® strives to provide you with a reliable hot tub that has all the equipment you need while not over complicating the product. You will find long-lasting underwater LED mood and safety lighting. Many models even have LED-illuminated cup holders to help you locate them after dark! An electronic water purifier assists with keeping the hot tub water clean and clear and our hot tub packages include a generous number of hydrotherapy jets that are carefully positioned to give you a satisfying massage. A premium Nordic hot tub cover tops it off for the best in energy efficiency, safety, and security.

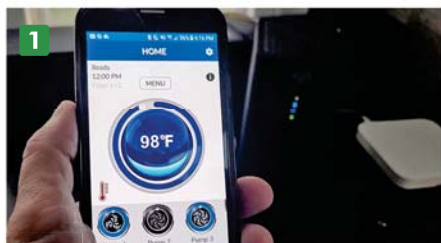

- 1 Outstanding Hydrotherapy Massage
- 2 Beautiful LED Lighting Package
- 3 Electronic Water Purification
- 4 Soothing Waterfall
- 5 Advanced Digital Controls

Wi-Fi Compatible Hot Tubs For Ultimate Convenience

Your Northern Hot Tub® can be equipped with an optional Wi-Fi module that connects to the internet via your home router. Once upgraded, you can download the app on your iOS or Android smartphone to monitor vital functions including heat and filtration schedules. Smart programming allows you to run your tub during off-peak electrical hours to save on costs. Plus, remote diagnostics can provide service codes to help troubleshoot issues from anywhere - a perfect solution for vacation properties!

- 1 Simple to Use App for your Smartphone
- 2 Monitor Your Hot Tub From Anywhere
- 3 Easily Control Jets, Lights & Temperature
- 4 Program Filter Cycles & Other Functions
- 5 Program to Run During off Peak Hours

Straightforward Hot Tubs Make Life Easier

A hot tub should help you relax, not add work to your routine. That's why our hot tubs are designed to be straightforward to maintain, with automatic systems that manage water care for you. From daily circulation to ongoing cleaning, everything works together to keep your water clean, clear, and ready to enjoy. There's no complicated process, no constant adjustments, and no unnecessary features just simple, reliable systems that take the stress out of ownership so you can focus on what matters most: enjoying your hot tub.

What Straightforward Means...

1

Automatic Circulation

2

Automatic Filtration

3

Automatic Purification

4

Automatic Sanitization

5

Self-Cleaning Floor

All-Inclusive Hot Tubs Simplify Buying

Many hot tub dealers price and package their products for their sales team to close more deals at higher prices. At Northern Hot Tubs®, all our hot tubs are all-inclusive packages, and there are no hot tub options, extended warranties, mark it up and mark it down tricks or sales games. You get everything available on the hot tub as one simple-to-understand package with hot tub financing available. A limited number of accessories are available such as entry steps and cover lifters. Your Northern Hot Tubs dealer will help you choose these items based on individual installation scenarios and needs.

- 1 Comprehensive Hot Tub Package
- 2 Steps, Cover Lifter & Backup Heater as Required
- 3 VIP Delivery and Set Up (Service Fees Apply)
- 4 Thorough Hot Tub Operation Orientation
- 5 Complete Water Care Instructions

Sensibly Priced Hot Tubs Give you Peace of Mind

We strive to bring you high-quality hot tubs at a sensible price, so you don't have to break the bank to unwind and relax in hot water. We do this by sourcing products with industry-leading American-made electronics, acrylic, resins, polymers, and other mission-critical components. We then contract high-quality, high-volume OEM factories to produce the hot tubs to our stringent standards. The hot tubs are shipped by the container load, directly from the factory to our Regional Distribution Centres or Dealer Partners location and then to your home saving you thousands of dollars.

- 1 Transparent and Haggle Free Hot Tub Prices
- 2 Low Monthly Payment Financing Available
- 3 No Upselling or Extended Warranties
- 4 No Gimmick Sales Approach
- 5 Best Price Always Guaranteed

Benefits of Owning a Northern Hot Tub®

"Love our new Hot Tub, was a great experience from purchase to install. We feel the price was fair and competitive, but more important customer service was great! The team made sure we were fully informed and knew what we were doing before leaving at the end of the install. Would highly recommend!!"

Janeen Nickel

To your **Good Health**

Hydrotherapy consists of three main healing components; heat, buoyancy, and massage. Together, they create an exceptional experience that is both relaxing and incredibly healthy. Using a Northern Hot Tub® regularly provides physical health benefits beyond just relaxation and pleasure.

Water is pure and simple, yet it can do the most amazing things. Whether you are experiencing joint or muscle pain, have trouble sleeping or are just plain stressed out, even spending time in an hot tub can provide therapeutic benefits for just about everyone.

Reduce Headaches & Stress

Warm water massage stimulates the body to release endorphins that can significantly reduce stress. The hydrotherapy jets in a Northern Hot Tub® can also dilate blood vessels to help prevent headaches. When it comes to falling asleep faster and getting a good night's sleep, the National Sleep Foundation clearly states that *"soaking in a hot tub before retiring to bed can ease the transition into a deeper sleep."* Many people use their hot tub daily as a part of their healthy lifestyle and consider a 20-minute session an important way to reduce headaches & stress.

Relieve Muscle & Joint Pain

In recent years the use of hydrotherapy hot tubs by athletes has skyrocketed and Northern Hot Tubs® are now set to lead the way in offering these benefits to a broader audience! A popular sports magazine said it best: *"Your skin and muscles loosen and relax from the increased blood circulation,"* adding that, if muscles are injured: *"A soak in a hot tub increases blood flow to the injured area, bringing nutrients to help repair the damage."* Using a hot tub daily will help relieve muscle pain by helping your body reduce lactic acid while increasing mobility.

Soothe Arthritis Pain

Warm water hydrotherapy treatment in a well-designed hot tub is believed to help those with pain caused by arthritis. It is also thought that hydrotherapy is one method of using water to help treat arthritis with the soothing warmth & buoyancy of the water, making it a safe, ideal environment for relieving pain. Arthritis can cause acute pain but is more likely to be long-lasting chronic pain. People must learn how to live with this type of condition, as there is no known cure. If you have arthritis, a hot tub may be an answer to life with a lot less pain & a lot more enjoyment.

Help Manage Diabetes

Researchers have reported that hot water & hydrotherapy, including a hot tub's regular use, can help control diabetes. It has also been known to lower blood pressure & significantly reduce blood sugar. A Colorado-based study recently revealed that diabetes patients who soaked in a hot tub for about 30 minutes a day, 6 days a week, found their average blood sugar level dropped by 13%! Even if your heart appears healthy, hop out of the tub after 20 minutes, never enter a hot tub alone & always be sure there is someone nearby in case there is an emergency.

Time with Family & Friends

How can many leisure activities targeted at relaxation be readily enjoyed at any time, day or night, without ever leaving home? The answer is practically none! A recent survey of swimming pool owners revealed that many only enjoyed their pools a few dozen times a year, and jetted bathtubs are also used very infrequently! In contrast, a hot tub is easy to use and is designed to maintain the user's water temperature consistently. As a result, it's always ready and waiting to be used for fun and relaxation - 24 hours a day, 7 days a week, 365 days a year!

Year Round Fun

A recent survey on usage revealed that owners have fun in their hot tubs an average of 150 times a year! Hot tubs are designed to maintain the water temperature you set them at, so your hot tub is always ready and waiting for you. Setting the water temperature in a Northern Hot Tub is so easy due to its fully electronic controls. While lowering the temperature on a Northern Hot Tub helps beat the summer heat, few moments in life come close to the sheer pleasure of being surrounded by warm bubbling water on a crisp, cold night.

Installation Ideas for Your Northern Hot Tub®

"Friendly staff and so helpful with setting me up with my on line ordering. Very welcoming and made me feel like I was dealing with family. Hot tub was installed with ease, and we are loving it! Used everyday as I have arthritis and I could not be happier. Thanks Northern Hot Tub team!"

Mike Dawe

Garden

Installing a hot tub in your garden creates a beautiful setting when using it. The natural surroundings add a calming effect and if you plan the hot tub orientation correctly, the primary seats will give you the best view of your property. Be sure to consider winter privacy when the trees cannot provide it. A properly selected and installed hot tub cover lifter can also double as a privacy wall. The cleanest garden hot tub installations have the wiring coming up through the weathertight base so there are no exposed wires running across the ground.

Pad Only

A Northern Hot Tub® is supported by a stainless-steel frame and the bottom is enclosed with a weathertight and critter-proof base. As a result, our hot tubs can be installed on any flat level surface, but a concrete slab, paving stone or patio stone pad is highly recommended. In addition, a hard surface hot tub installation remains clean which helps prevent users from tracking debris. Remember, convenience is paramount so place it as close to your door as possible and if you need us to visit you for a free in-home consultation this is always welcome.

Adjacent

It is common for an existing wood deck to be in place before a hot tub is purchased. If you don't have room on your deck or don't want the hot tub to obstruct views from the home, installing a hot tub adjacent to a deck can be the perfect solution. A hard surface such as a concrete pad or patio stone base is recommended. Consider the hot tub step placement, cover lifter position and travel. This is one of our favorites and most recommended hot tub installation methods due to the overall aesthetics and low profile of the hot tub when looking out from the home.

In a Deck

The main reason for installing a hot tub in a deck is sheer aesthetics. It lowers the profile of the hot tub in the deck, which can be more visually appealing. Whether you are considering a hot tub or a plug and play hot tub, your hot tub installation must consider service access. If installing your hot tub in a deck, it must include removable deck panels on all four sides. If it does not, and the hot tub requires service, you will need to drain the hot tub and assemble the necessary manpower to lift it out of the deck before any servicing can occur.

On a Deck

Placing on an existing deck is one of the most common hot tub installation methods. You can easily run the electrical wire under a wood deck or in a conduit across a stone deck. If you are placing it on an existing wood deck, be sure the deck construction is strong enough to hold the weight of the hot tub. Deck specifications can be found in our hot tub FAQ section on our website. Hot tub deck installations are quick and straightforward. Plan for accessories like the cover remover and step. You will also need access to a gravity drain port, so keep this in mind.

Porch

A covered porch can be the ultimate premium or plug and play hot tub installation scenario. Significant benefits are that the hot tub is not directly exposed to the elements. This makes it easier to maintain and prolongs the life of the cover and the hot tub. Hot tubs are installed under a porch or are usually close to the access point of the home, and we recommend this as convenience is paramount. Porch hot tub installations are very practical because the hot tub, hot tub step and hot tub cover lifter can be orientated to make it easy to use & operate.

In ground

An in ground hot tub installation is the most complex and expensive. It is essentially installed like a swimming pool where the area is excavated, and the hot tub shell is placed into the excavation. The pump(s), filter and heater are installed in a suitable remote location. Inground hot tub installations are expensive, but you can apply directly on our website if you need hot tub financing. Cover lifters do not work with inground installations and be prepared for dirt and debris to blow in while using the hot tub, and anytime the cover is off.

Gazebo

A gazebo with your hot tub centre adds dimension and shelter from the sun and elements. Gazebo hot tub installations are popular in treed environments to help keep leaves and debris from falling on the cover and in the water. No matter what Northern Hot Tub model you choose, a cover lifter solution can act as a privacy wall or windbreak when open. Interior seating configurations differ between the various hot tubs, so keep this in mind because the proper orientation of the primary seats will play an essential role in choosing a model.

"After shopping around I was sold on the features of the Georgian and the warranty it comes with. The company was great to deal with. Delivery went smoothly and I was taught everything to maintain the tub. I was surprised how well built the tub is and the service was 5 star. Definitely would recommend Northern Hot Tubs to anyone. AWESOME job and thanks again everyone!"

Alex Clark

Northern Hot Tubs® Authentically Northern

Northern Hot Tubs are designed to withstand the harsh Canadian climate and provide many years of worry-free ownership. A hot tub must be comfortable, energy-efficient, easy to maintain, deliver a fantastic hydrotherapy massage, and be free of troublesome gadgets for maximum hot tub enjoyment. Our Northern Hot Tubs® will provide everything you need to soak, rejuvenate, and relax in complete comfort.

"It was an absolute pleasure working with this company to purchase our first hot tub - the Georgian. Right from the start, Len took us through the options and answered all our questions. Tanya was lovely and informative as to the payment and delivery processes. Thanks to Steve and his crew for the install - all so friendly and punctual, and set up time was much faster than we expected. They were thorough in explaining the ongoing maintenance and features. We were able to enjoy our first soak that very evening and we've made excellent use of it since! We highly recommend this company for its professionalism, service and price point."

Shalini Maharajl

"Our new hot tub was delivered a couple days ago. It was set up, filled and started. The guys were great at explaining everything and going through the maintenance process. All and all a seamless experience and we would highly recommend Northern Leisure Products without question."

Enjoying your 4-6 Person Hot Tub is Like Clockwork

The clock analogy works best when just two people are sharing a soothing soak. One of you represents the hour hand; the other embodies the minute hand. Hot tubbing is like clockwork because you are supposed to move throughout the hot tub like the hands on a clock, slowly and methodically.

Size Matters with a 5-6 Person Hot Tub

A 6 person hot tub is considered a large hot tub and measures about seven feet square. Make sure you have enough room on your deck or in your backyard, and don't forget to leave enough room for the cover to open and close on a cover lifter and for an entry step at the front of your 5-6 person hot tub if installation is above grade.

WILLISTON II

Entertaining is Fun with a 6-7 Person Hot Tub

A 6-7 person hot tub is also an entertainer's delight because it has room for up to three couples or can be packed with kids from three or more families. This hot tub is considered a large hot tub and measures about seven feet square.

LAURENTIAN II

SPECIFICATIONS

Dimensions: 110" x 87" x 38"

Dry Weight: 1058 lbs / 480 kg

Weight: 5357 lbs / 2430 kg

Volume: 515 US Gal / 1950

WOW Factor: 11/10

If extra-large is your preference, the Laurentian 8 person hot tub will suit your needs with a single lounge and 7 multi-level seats. This is an entertainer's delight or the perfect hot tub for those with large families and large groups of friends. Imagine a day of skiing and then heading back to the 8 person hot tub with your ski group. Young children also love our Laurentian Hot Tub model as they can swim around like a pool on a year-round basis, and many homeowners with small backyards opt for this rather than installing a pool or swim spa. Our 8 person Laurentian hot tub includes numerous hydrotherapy features and is loaded with creature comforts, modern technology and more.

Many Install an 8-10 Person Hot Tub as Opposed to a Pool

Extra-large 8-10 person hot tubs are the pinnacle of absolute hot tub ownership and offer the highest bather load possible. If you have an extra-large family or your home is party central, an 8-10 person hot tub may be the perfect choice for you.

A large, rectangular hot tub with a white top and dark base is situated on a wooden deck. The hot tub's cover is open, revealing the interior with several jets. The deck is surrounded by lush greenery, including ferns and flowering plants. A string of warm-toned outdoor lights hangs above the hot tub. The background shows a dense forest of tall trees.

"Great experience end to end in getting my new hot tub from Northern. I appreciated all the details they've thought of for new owners learning the ropes. Great tutorials and personal touches through out the process of buying and set up. I would buy from Northern again ... Love the team, super easy to deal with!"

Jen Bombis

"Excellent service and support from office staff! Then they delivered the hot tub as scheduled, set it up, and gave us detailed instructions on the use, care & maintenance of the hot tub. Also diagnosed and solved minor problems with the electrical connection and with the set-up and use of the phone app. Highly recommended!"

Rudy Hartman

"We had a fantastic experience with Northern Hot Tubs. The staff was very helpful with the purchasing of the Williston model and coordinating of installation of the tub. There was a slight mix up in scheduling which was rectified immediately and we were sent flowers and homemade honey as a thank you. They installed the tub and put us through "hot tub school" to learn the ins and outs of maintenance and using the Wi-Fi enabled features. 10/10 would recommend a Northern Hot Tub to anyone."

Here are some of the benefits of a Plug and Play hot tub

A Plug and Play hot tub is an affordable option, granted they don't come with all the bells and whistles. This type of hot tub is only 110 volts, meaning it will cost less (they draw a lot less wattage). You can simply plug the hot tub into an outdoor weather-resistant outlet. Plug and Play hot tubs weigh less, making them significantly straightforward to move and transport. This means that if you rent your home, you can still enjoy the benefits of a hot tub. Just take it with you when you move!

SIMCOE 120V PLUG & PLAY

SPECIFICATIONS

Dimensions: 80" x 80" x 33"

Dry Weight: 550 lbs / 249 kg

Weight: 2321 lbs / 1052 kg

Volume: 231 US Gal / 874 L

WOW Factor: 8/10

A plug and play hot tub is a great way to relax in comfortable hot water and provides the easiest solution for backyard installations. The Simcoe plug and play hot tub model is the right size for most families and offers a lounge and multi-level seating for you and up to 4 other guests. Advanced electronics make it easy to operate, and the entire cavity is polyurethane spray foamed for added insulation. The plug and play hot tub comes with a cord and GFCI plug eliminating the need to have a dedicated circuit installed from the electrical panel. Place the hot tub on your deck, fill it with water, plug it in and viola!

Plug and Play Hot Tubs: The Name Says it All

You've decided that you finally want to get a hot tub but aren't sure you want to make the full investment for whatever reason. Maybe it's a budget constraint or perhaps it's a space thing - maybe both. You're ready to get into hot water (literally) but you don't want any part of getting into hot water (figuratively).

Our Plug and Play Hot Tubs Have It All

Our plug and play hot tubs come with a cover and we also cover you with a no-nonsense, no fine print guarantee - should the need arise. So, rest comfortably inside our plug and play hot tubs and then rest assured you made a smart choice to get one.

All the Right Reasons for an **All Season Pool**

The Perfect Combination of a Swimming Pool and Hot Tub.

Thus creating a healthier lifestyle. This All Season Pool offers a new approach to healthier living. If you live an active lifestyle with regular aquatic exercise or are a casual swimmer, you can enjoy the ideal all-season pool with a blend of relaxation and recreation. Whether you want family time, fun or fitness, the North Stream All Season Pool will make lasting memories and enhance your outdoor entertainment experience.

Our All Season Pools are well-built and fully loaded, making the backyard fun and enjoyable. Imagine never having to turn, touch or push off from any pool wall to get the swim you want. With our All Season Pool, your dream of a year-round backyard pool and hot tub combination can become a reality. The swim current delivered is firm and smooth, allowing you to focus on your swim technique and enjoy the fluidity of the swim current adjusted to your personal swim level.

Made for Canadians

and Can Be Used Year Round and So Much More

Our Swim Spas can be used throughout the year, as they can be heated and used even in colder weather. This makes them a great option for those who want to maintain an active aquatic lifestyle regardless of the season. Our swim spas are a space-efficient alternative to traditional pools. They can be installed in a backyard, patio, or indoors. Northern Swim Spas® are well-equipped with everything you need to complete your swim spa experience.

The Ultimate In Relaxation and Aquatic Exercise

Northern Swim Spas® are versatile aquatic installations that offer a combination of a small swimming pool and a hot tub. They are designed to provide both exercise and relaxation in one unit. Our swim spas are typically smaller than traditional swimming pools but larger than regular hot tubs. The primary purpose of our Swim Spa is to provide a space for swimming or aquatic exercise. They include a strong current or jet propulsion system that allows users to swim in place. The current can be adjusted to suit your swimming pace. In addition to the swimming area, our swim spas have areas equipped with hydrotherapy jets, similar to those found in a Northern Hot Tub®. The strategically placed jets provide hydrotherapy and relaxation benefits. You can use the swim spa area to unwind, soothe sore muscles, or simply enjoy a warm soak.

Here are some Northern Swim Spa benefits

Our Northern Leisure Swim Spas® are well-built and fully loaded, making the backyard fun and enjoyable. Imagine never having to turn, touch or push off from any pool wall to get the swim you want. With our All Season Pool, your dream of a year-round backyard pool and hot tub combination can become a reality.

NORTH STREAM ALL SEASON POOLS

Low Monthly Payment
Financing Available

North Stream All-Season Pools offer a smart, space-efficient alternative to a traditional swimming pool, combining swimming, relaxation, and hydrotherapy in one self-contained, year-round design.

North Stream 12' All-Season Pool is the most compact option in the range, making it ideal for smaller yards and urban spaces. It provides a comfortable swim area alongside integrated seating with targeted hydrotherapy, allowing swimming and soaking in one versatile pool solution.

North Stream 14' All-Season Pool offers a more generous swim area while maintaining a balanced footprint. Designed for families and active lifestyles, it blends enjoyable swimming with full-body hydrotherapy seating, creating a relaxing and social all-season pool experience.

North Stream 16' All-Season Pool is the largest space for swimming, seating, and hydrotherapy comfort. With its extended swim area and enhanced relaxation features, it is an ideal all-season pool solution for larger households and outdoor living spaces.

North Stream 19' All-Season Pool is a Dual Temperature All-Season Pool / Swim Spa and hot tub all-in-one. It comes fully loaded with premium features and engineered for durability, comfort, and performance. This all-season swim spa creates unforgettable experiences while enhancing your outdoor living space.

Introducing Our Premium Ice Bath Tubs

Recover Like Athletes Do

Unless you have been a competitive athlete or have parented a child who travels all over the region competing in the highest level of their chosen sport, the concept of cold-water therapy might be chilling to you. Why would anybody want to get into a tank of cold water purposefully? Our Cold Plunge Tanks will help you lead a happier, healthier lifestyle if you want to delay the onset of sore muscles, feel less tired, or treat inflammation.

For Sore Muscles, our Cold Plunge Tanks work to constrict your blood vessels. Your blood flow slows down enough to relieve much of the painful feeling and swelling you are experiencing in your muscles after physical activity. It doesn't have to be that you went for a run or played in a badminton tournament. Cold Plunge Tanks will help your muscles if you've been standing a lot at work, walking your dog, or using muscles you haven't used in a while.

Feel Less Exhausted our Cold Plunge Tanks provide cold water therapy to help re-exhilarate you and put you in a more positive mindset because of certain brain chemicals released when you are chilling. The result is that you get a second wind to get through the rest of your day.

Muscle Inflammation, our Cold Plunge Tanks can assist with widespread concerns such as tendonitis or bursitis. The therapy provided by the cold water serves as an anti-inflammatory without having to take medicine. The affected area becomes numb, and the pain, swelling or tenderness you feel subsides as your circulation improves.

PREMIUM ICE BATH TUB

SPECIFICATIONS

Dimensions: 84" x 40" x 32"

Dry Weight: 308 lbs / 140 kg

Weight: 1,440 lbs / 640 kg

Volume: TBA

WOW Factor: 10/10

SEATING CAPACITY

- 1 x Maximum Seating

WATER MANAGEMENT

- Micro-Filtration System
- Electronic Water Purifier
- Dedicated Circulation Pump

Foldable Muskoka Chairs

Innovative Durable and Convenience

Northern Leisure® Muskoka Chairs are crafted from premium virgin high-density polyethylene (HDPE), offering exceptional durability, colour retention, and UV protection to resist fading over time. Inspired by the timeless design of the traditional Muskoka chair, our innovative foldable construction allows for easy storage during the winter months without compromising style or comfort. By combining high-quality materials with thoughtful engineering, we create outdoor furniture that is both beautiful and built to last. Each chair is precision-manufactured using advanced computeraided cutting technology, ensuring superior fit, finish, and ergonomic comfort.

Discreetly installed stainless steel hardware adds strength and durability while providing years of maintenance-free enjoyment. Our chairs arrive partially assembled and can typically be completed in just five minutes. For added protection during transit, each chair is carefully packaged in a flat, protective box to help ensure it arrives safely at your home or cottage.

FOLDABLE
for convenient
winter storage.

Low Smoke Fire Pits

Ignite the perfect outdoor ambiance without the smoky hassle!

Our new Stainless Steel Low Smoke Fire Pits features a sleek, durable design and advanced airflow technology for a cleaner, more enjoyable burn. Complete with an essential ember guard and lift tools, it's engineered for backyard beauty and safety.

Northern Leisure Saunas Authentically Northern

Northern Leisure Saunas are the perfect complement to your Canadian backyard. They blend into the landscape and accessorize your home or cabin – all thanks to the aesthetically-pleasing authentic Canadian red cedar construction. Not only do they look great, they also operate with ease and are built to last through the often inclement weather we are accustomed to here in the North.

"Northern Leisure does a great job. They truly are a homegrown, grassroots business. We work along side them often and use them for all our saunas. This is our personal one along with some job site ones. I think what separates Northern from other companies is their customer services, quality and exceptional variety. Highly recommend them!"

Georgian Ranger

"I just want to say how helpful and patient the staff was with me during the time of purchase of our new sauna from Northern Leisure Saunas! The Installation team was professional, very knowledgeable, and left my property as clean as it was when they arrived! Thank you Henry I would recommend you and your team to everyone!"
