

Hot Tub Base Installation GUIDE

Follow these simple rules for the perfect hot tub installation that will provide years of enjoyment.

DON'T...

The entire bottom of the hot tub must be fully supported.
Failure to do so can result in structural damage.

DON'T...

Uneven base prevents the hot tub from being fully supported.

The entire bottom of the hot tub must be fully supported.
Failure to do so can result in structural damage.

DON'T...

Hot tub base should not slope more than 1/2" over 8'. **Hot tub must be as level as possible.**

DO...

Hot tub is level within 1/2" and bottom is in full contact with the base.

The hot tub base can be made from concrete, patio slabs, paving stones or set on a properly supported wood deck.

Keep this in mind when installing...

- Provide for adequate water drainage.
- Allow adequate access for future service
- Plan space for steps and a cover lifter.
- Leave 3' of wire slack inside the hot tub incase it needs to be moved for service.
