

Swim Spa Base Installation GUIDE

Follow these simple rules for the perfect swim spa installation that will provide years of enjoyment.

DON'T...

The entire bottom of the swim spa must be fully supported.
Failure to do so can result in structural damage.

DON'T...

Swim spa base should not slope more than 1/2" over the entire base. **Swim spa must be as level as possible.**

DON'T...

Uneven base prevents the swim spa from being fully supported.
The entire bottom of the swim spa must be fully supported. Failure to do so can result in structural damage.

DO...

Swim spa is level within 1/2" and bottom is in full contact with the base.

The swim spa base can be made from concrete, patio slabs, paving stones or set on a properly supported wood deck.

Keep this in mind when installing...

- Provide for adequate water drainage.
- Allow adequate access for future service.
- Plan space for steps and roll away cover.
- Leave 3' of wire slack inside the swim spa incase it needs to be moved for service.
